Re: Oracle USA, Inc., et al v. Rimini Street, Inc., et al., Case 2:10-cv-00106-LRH-VCF

Dear Casey:

Thank you for confirming Rimini's agreement to move ahead with the proposed schedule for custodial productions, and for your custodian proposal.

Regarding the selection of custodians, we disagree with Rimini's unreasonable proposal to limit a custodial search and production to four custodians. The enjoined and accused conduct is not limited to update development (as are Rimini's proposed custodians). In addition to custodians for PeopleSoft and JDE development, the selection of custodians should also include (a) executives and policy-makers at Rimini, (b) developers for in-house tools like AFW, and (c) customer environment support personnel.

With that in mind, and informed by our understanding of Rimini employees' roles from prior discovery, we propose the following custodians, including those proposed by Rimini:

Executives and Policy Makers	Grady, Sebastian Lyskawa, Nancy Ravin, Seth
In-house Tool Developers	Frank, Richard (Rick) Sheffield, Don
Customer Environment Support Personnel	Conley, Kaitland Hosalli, Manjula Miller, David
PeopleSoft Developers	Benge, James (Jim)

 Page 2

	<p>Conley, Tim Davenport, Brenda Tahtaras, Susan Wood, Kevin The lead developer for updates delivered between December 2018 and February 2019 (as identified by Rimini)</p>
JDE Developers	<p>Grigsby, Ray Jacob, Michael Sharma, Sai Teegarden, Ron Tidwell, Gary The lead developer for 2018 year-end updates (as identified by Rimini)</p>

Given that time is of the essence, we request that you collect documents and report on hits for each proposed custodian. In return, we will agree that such collection is without prejudice to any ultimate agreement or refusal to review or produce documents from any given custodian, and that the parties will discuss the final custodian list at the July 19, 2019 meet-and-confer. If this is not acceptable, please let us know immediately (and by no later than Monday, July 15).

Regarding keywords, below are proposed Boolean search terms, listed with respect to topics for ease of reference:

Topic	Boolean search terms
Injunction	Injun*, enjoin*
Automated Framework	AFW*, Automat*, Frame*, rsiRequest*, rsiReturn*, UpdateSelf*, Gen Diff*, GenDiff*, Apply Diff*, ApplyDiff*, GenApply*, Gen Apply*, ApplyUpdate*, Change set*, diff*, k-diff*, hash*, rehash*, push*, SendClientFiles*, Send Client Files, ReturnClientFiles*, Return Client Files*, __done__.txt, __done_x.txt, *WriteLogDT*, GenHash, Gen Hash*, JobNbr, Job Number*, GenDataChanges*, CreateUpdate*, Create Update*, CopyFromAnotherUpdate*, Copy From Another Update*, VerifySourceFiles*, Verify Source Files*, Delete Client Files*, DeleteClientFiles*, CodeAfter*, Code After*, Code_After*CodeBefore*, Code Before*, Code_Before*, SourceClient*, Source Client*, many to many, one to many, *rsiarc
